Feed Management

Precision feed loading

As feed represents roughly 50% of livestock costs, it's essential to incorporate a precision management plan to maximize returns. Upon determining TMR, loading is the next critical step in managing inputs, improving efficiency, optimization, and enabling performance tracking. The Digi-Star 2810 ensures accurate execution and logging, providing necessary metrics to improve operational profitability; know exactly what's going in and what it's returning.

Compatible with virtually any TMR mixer on the market, the solution offers indicator options featuring Bluetooth® for remote connectivity. Additionally, for increased monitoring capability, the solutions come standard with a mobile application named FEED (mobile) app for IOS and Android – providing cab control, feed sheets, and remote support. The solutions are designed for organic user-progression, offering basic data logging today with the option to connect to advanced feed management software via Topcon Agriculture Platform (TAP FEED).

- » Optimize TMR inputs through precision loading, improving profitability
- » Free mobile app (FEED App) for in-cab control and monitoring improving efficiency and eliminating manual feed sheets.
- » Remote support capability for reduced downtime
- » Connect to TAP FEED and have the most advanced feed management software tied directly to the mixer

1 Digi-Star 2810

Bluetooth® indicator on feed mixer acting as controller and display

1 or Digi-Star 2010

Smart junction box with integrated Bluetooth® functionality

2 FEED App

In-cab app for increased control

3 Load Cell

Load cells for accurate weight measurement

4 Digi-Star FD1

Intuitive batching display in tractor or loader cabin

5 CL55

Cloud connectivity device for Digi-Star FD1

Reduce costs. Fine-tune performance.

Feed Management Software

TAP FEED is the latest evolution in modern feed management. Tied directly to the feed mixer to improve workflow efficiency, the software provides clear, powerful functionality to manage livestock's greatest operating cost. With subscription options to suit every operation, dairy farmers can easily manage products, feeding groups, feed lists, load mixers, feeding periods, operators, and more. Efficiently create and export comprehensive reports, including ingredients usage, loads, DM intake per head, ration delivery, group delivery, and operator accuracy. Permit

access and share with trusted advisors, too. Feed management has never been easier, more connected, or cost-effective.

Managing feed can be messy. From loading and tracking to logging and optimization, dairy and beef farmers need a streamlined approach. TAP FEED fuses management software with load mixer integration. It's designed in collaboration with industry partners to provide easy-to-use features to improve efficiency, reduce waste and improve production.

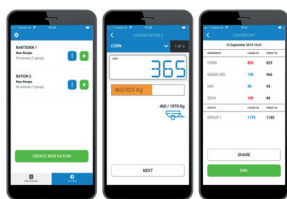

Third Party Link

Connect any TAP FEED subscription to third party feed management software and technology (e.g. herd management, milking robotics, concentrate boxes, feed suppliers, and more).

Advanced Inventory Manager

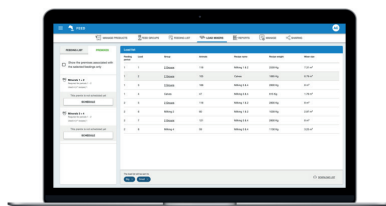

Tools to manage and track feed inventory, including input ordering features, ingredient and inventory management, re-ordering system, weighbridge (third party connection), inventory alerts, and inventory reports.

FEED App

Easy to use with relevant features for feed management, the App is free with the latest lineup of Bluetooth® Topcon/ Digi-Star displays and weigh converters – enabling an organic transition into feed management software.

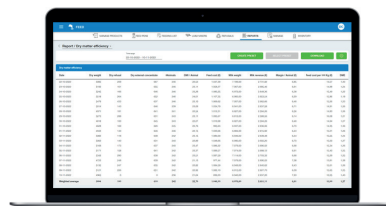

- Any livestock operation
- Workflow integrated into feed mixer (Requires Topcon display or converter. Compatible with legacy Digi-Star hardware)
- Connected to TAP FEED Lite/Pro
- Basic reports
- Loads and recipes
- Feeding groups

TAP FEED Lite

Valuable for any livestock operation, Lite easily manages ingredients, recipes, feeding groups, feed lists, load mixers, feeding periods, operators, and more. Efficiently create and export comprehensive reports that include ingredients usage, loads, DM intake per head, ration delivery, group delivery, and operator accuracy.

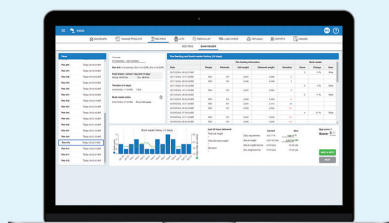

- Any livestock operation
- Workflow integrated into feed mixer (Requires Topcon display or converter. Compatible with legacy Digi-Star hardware)
- Connected to TAP FEED app
- Core feed management capability
- Exportable reports

TAP FEED Pro

Specially designed for dairy operations, Pro builds upon TAP FEED Lite features to offer advanced ingredient, recipe/pre-mix, pen, operator, and dry matter efficiency (DME) management, with automated refusals, zone control, expanded reports, and enhanced sharing tools.

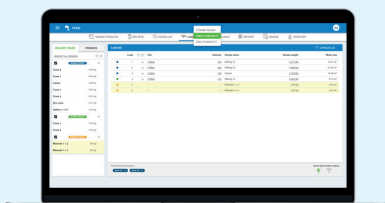

- Dairy operations
- All TAP FEED Lite features
- Plus Advanced Dairy features
- Dry matter efficiency reporting
- Supports different recipe types
- Zone control
- Extended report formats

TAP FEED Feedlot

Valuable for any feedlot operation who needs to track feed or other costs by Lot or by Owner. Easily manages ingredients, recipes, animal pen movements, bunk scores and operators. Efficiently create and export comprehensive reports that include operator accuracy, commodity usage and lot closeout summaries.

- Any feedlot operation
- Workflow integrated into feed mixer
- Connected to any Digi-Star feeding hardware and feed app
- Core feedlot management capability
- Lot closeout report

TAP FEED Advisor

Designed to optimize the feed management workflow between consultants, advisors, and farmers. Remotely monitor activities, create reports, analyze use, and provide valuable insights for improved customer profitability, all in real-time. Easily align and connect your business, including a "sub-advisors" framework to support lasting customer relations.

Digital Feed Management Software for Advisors

TAP FEED Advisor

To this day, many livestock farmers manually report feeding results (e.g. via spread sheet or even handwritten documents) to their advisors, impacting data accuracy and support efficiency. TAP FEED Advisor coupled with TAP FEED Farmer, Lite and Pro subscriptions streamlines the workflow through a connected feed management ecosystem. Tied directly to the mixer via mobile application, the solution collects exact feeding data and automatically uploads for analysis, even enabling real-time support. It allows advisors and feed companies the data quality necessary for relevant insights and the efficiency to provide impactful recommendations.

Remotely monitor activities, create reports, analyze use, and provide valuable insights for improved customer profitability, all in real-time. Easily align and connect your business including a "sub-advisors" framework to support lasting customer relations.

- » Management tool for feed advisor to setup, monitor and support clients
- » Core feed management capability.
- » Exportable reports
- » Dry matter efficiency (DME) management (Link Add-on required)
- » Compatible with legacy Digi-Star hardware
- » Integrated demo capability
